

After School Computer Coding at St. Margaret of Cortona School

With CodeSpeak Labs, students will learn to design their own web apps and video games! We'll first guide them through programming basic game dynamics, and then give them the space to creatively design their own projects.

Students in grades 1-3 will use Scratch, an MIT-developed block-based coding language. Students in grades 4-8 will start with Scratch and then move on to JavaScript, one of the most popular programming languages of the web, Parents will receive links to their child's projects at the end of the semester.

Thursdays

Grades 1-3: 3 - 4 pm

Grades 4-8: 4 - 5 pm

Dates: 9 sessions starting October 17th

Fee: \$200/student
